

Press Release

829-843 The Northern Road Cranebrook

Infracorp Limited (Infracorp) has commenced discussions with Penrith Council (Council) for the planned rezoning of the land recently purchased at 829 – 843 The Northern Road Cranebrook.

Council have advised that any rezoning of the site will be managed as part of the preparation of the comprehensive Rural Lands Plan, which is currently underway. The statutory consultation process for preparation of this plan is complete, and drafting of the plan has commenced.

Infracorp has commissioned a full range of studies on the site by expert consultants and will work with council to inform and consult with the local community on important issues. The studies will identify the capability of the land, and will determine appropriate future development. Possible future development options may include low density rural-residential and aged housing.

Council have created an internal project team to respond to the various studies provided by their respective counterparts engaged by Infracorp.

Council and Infracorp are exploring the most effective methods of keeping the community informed of the investigations into possible future options for development.

Infracorp is committed to working closely with Penrith Council and the community to achieve a carefully conceived outcome for the site.
